Education

SUTech University – Faculty of Engineering technology
BSc in Data Science & AI | *Expected Graduation: 2028*
CGPA: 4.0 | *Top Achiever Award – 2024*, 2025

Professional Summary

Second-year AI & Data Science student with a 4.0 CGPA and practical experience in AI tools, leadership, and innovation. Passionate about leveraging technology for social impact through machine learning, deep learning, and large language models. Actively involved in national tech programs and real-world AI projects.

Programs & Internships

- **FDAI –** Ministry of Youth and Sports
  AI committee member
- **Aspire Leaders Program** – Harvard-affiliated
  Global leadership & innovation program focused on social impact.
- **InnovEgypt Program** – TIEC & iSpark
  Bootcamp for creative problem-solving and entrepreneurship.
- **E-Finance** – Internship
  Technical training focused on applied industry experience.
- **AIESEC Youth Exchange** *(Exploratory Experience)*
  Short-term cultural and leadership exchange.
- **WHCL Competition – Finalist** (4th place)
  ProofMe: AI-powered platform verifying ownership of media to combat deepfakes.

Projects

- **Amazon PartyRock – AI Productivity Coach**
  Gen-AI app that suggests jobs, builds CVs, and gives study tips.
- **SolveThe17 Hackathon Project**
  UN SDG-aligned platform supporting children and people with disabilities

- **CyberNest SOAR – AI Vulnerability Engine**
  Developed an AI-driven vulnerability prioritization and patch recommendation engine integrating SSVC and EPSS to enhance automated incident response and risk-based decision-making.
- **Project Management Dashboard**
  a full-stack project management system using PHP, MySQL, and JavaScript featuring Kanban board, task tracking, role-based access control, and deadline management.
- **Treasure Hunt in the Museum (C++)**
  A procedural text-based adventure game using linked lists and dynamic puzzle logic.
- **Process Scheduling Simulation Project**
  Two versions (Python GUI & Web-based JS/HTML/CSS) simulating CPU scheduling algorithms (FCFS, SJF, Priority, Round Robin) with performance metrics visualization.
- **Bus Ticket Booking System**
  Java GUI desktop app for managing bookings and schedules.

"Additional projects including SQL databases and IoT systems are available on my [GitHub | Portfolio]"

Courses & Certifications

- Introduction to Generative AI with AWS – *Amazon & Udacity*
- Microsoft AI Skills Fest *(2025)*
- Responsible & Ethical AI
- Introduction to Data Science
- Sustainability for Employability – *United Nations*

Skills

Languages & Tools: Python, Java, HTML, JavaScript, CSS, PHP, SQL, Git, Arduino, VS Code, Power-BI, TensorFlow (Basic), Jubyter.
Concepts: Machine Learning, LLMs, OOP, Databases, Data Structure, Networking, Data Analytics & Visualization.
Soft Skills: Leadership, Teamwork, Public Speaking, Project Management , Presentation skills
