EDUCATION
SUTech University
B.Sc. Data Science & AI
CGPA: 4.0 | Expected 2028
Dual cert. — Amity Univ., India
Top Achiever Award 2024, 2025

CERTIFICATIONS
• Generative AI with AWS (2025)
• Microsoft AI Skills Fest (2025)
• Responsible & Ethical AI (2025)
• Intro to Data Science (2024)
• Sustainability — UN (2024)

LANGUAGES
Arabic — Native
English — B2 — British Council
French — Intermediate
German — Basic

AWARDS & ACTIVITIES
• WHCL Finalist — 4th Place (ProofMe)
• FDAI Summit — Organizing Committee
• SolveThe17 Hackathon Competitor
• GDG Cairo — AI & Innovation
• Group Leader — SUTech Univ.

Nayra Ahmed Araby

AI & Data Science · Machine Learning · LLMs · Data Engineering

PROFESSIONAL SUMMARY

Second-year AI & Data Science student (4.0 CGPA) currently doing research at Matsuo Lab, University of Tokyo. Building ML/LLM components for an AI-driven cybersecurity platform while bringing experience from Harvard-affiliated leadership, Google AI, and two industry internships. Track record across national tech competitions and community outreach.

TECHNICAL SKILLS

Languages: Python Java C++ SQL JavaScript PHP Bash/Shell HTML/CSS
AI / ML: TensorFlow Scikit-learn Deep Learning LLMs Generative AI Neural Nets CSP
Pandas NumPy Power BI
Backend & DB: FastAPI REST APIs MongoDB MySQL Firebase SQL Server
Cloud/DevOps: GCP Databricks AWS Docker Linux Admin Git & GitHub

EXPERIENCE & PROGRAMS

Research Participant — Matsuo Lab, University of Tokyo 2026 – Present
• Engaged in AI and deep learning research at one of Japan's leading AI laboratories.

Build with AI: Masr Edition — Google Apr – May 2026
Google Training Program
• Completed hands-on AI development training using Google's AI tools and APIs to build real-world applications.

Aspire Leaders Program — Harvard-affiliated 2025 – 2026
Competitive Global Leadership Program
• Selected for a leadership development program focused on innovation, global impact, and social entrepreneurship.

Data Science Intern — E-Finance Aug – Sep 2025
• Completed the full data-science lifecycle (engineering, cleaning, analysis) on an Amazon-style retail dataset.
• Built an interactive Power BI dashboard surfacing sales and customer insights for decision-making.

AI Committee Member — FDAI, Ministry of Youth & Sports Aug 2025 – Present
• Designed and delivered AI-awareness campaigns, training courses, and workshops for youth across Egypt.
• Helped organize the Financial & Digital Inclusion Summit hosted by Egyptian government ministers.

Participant — InnovEgypt Program (TIEC & iSpark) Jul – Aug 2025
Entrepreneurship & Product Innovation Bootcamp
Intern — Mylerz 2024 – 2025
Logistics & Technology Industry Experience

SELECTED PROJECTS

CyberNest SOAR — AI Vulnerability Engine
AI, SSVC, EPSS, Automation | Ongoing
• ML/LLM-based prioritization of security vulnerabilities with automated patch recommendations.
• Integrates SSVC & EPSS scoring frameworks with LLM-based reasoning for incident response.

HR Analytics — Employee Attrition Prediction
Python, Scikit-learn, Databricks, Power BI
• Predicted employee attrition on Databricks with segmentation analysis and interactive dashboards.

Fitness Tracker API — AI-Powered Planning
FastAPI, Python, MongoDB, Neural Networks, CSP
• Backend using CSP for schedule generation and neural networks for adherence prediction.

Linux Monitoring System
Bash, Shell Scripting, Linux Administration
• Enterprise-grade server monitoring with automated security checks and interactive dashboard.

Student Burnout Analysis
Python, Pandas, Matplotlib, Seaborn, Power BI
• Burnout pattern analysis with visualization dashboards and evidence-based intervention recommendations.

MindMind — Accessibility Platform | SolveThe17 Hackathon
TypeScript, React
• SDG-aligned web platform supporting children and people with disabilities in accessing learning.

Process Scheduling Simulator
Python, JavaScript, HTML/CSS
• FCFS, SJF, Priority & Round-Robin CPU algorithms with performance-metric visualizations (GUI + web).
